

**Aging Where automation happens.** 

R00100

# **ROO**100<sup>™</sup>

## HOW IT WORKS.

A CLOSER LOOK: POUCH CARRIER TRACK (5-STATION MODEL SHOWN)

## **KEY FEATURES**

## MACHINE OPTIONS. The ROO-100 can feature:

## WASHDOWN

Machine can feature washdown structure with Nema 4x enclosures. so you can clean the machine with a spray of water without worrying about electrical components or rust.

## **BOTTOM POUCH SUPPORT**

Conveyor system provides additional support for heavier pouches, relieving pressure on the grippers.

## **CODE/DATE PRINTER**

Prints a code/date on the pouch Inludes camera verification.

## NITROGEN GAS FLUSHING

Fills the pouch with nitrogen right before sealing the pouch. Nitrogen (unlike oxygen) keeps your product fresh.

## POUCH DEFLATOR

## Eliminates excessive air from the pouch.

## **VIBRATORY SETTLER**

Provides improved product settling inside the pouch.

## DUST SHROUDER

Remove excess dust generated during filling stage. For non-free-flowing products.

## HOLE PUNCH/DIE CUT

Punches or cuts a hang hole after pouch sealing.

## SEAL COOLER

Cools the area of the pouch that is heated by sealing.

## **PRODUCT INFEED OPTIONS. The ROO-100** can be integrated with standard filling/dosing systems:

#### **AUGER FILLER**

## **VOLUMETRIC CUP FILLER**

Recommended for free-flowing solids like rice, candies or frozen peas or powders that don't generate dust

## **MULTIHEAD WEIGHER/SCALE**

Allows more packs per weight of product, and more packs per shift due to improvement of weighing accuracy. Suitable for complex, multiple component products like cereal mix.

#### **VIBRATORY COUNTER/FILLER**

Suitable for packaging application where measuring precision and accuracy are crucial and for products that are uneven, such as wafers, grains, and nuts.

## **ROBOTIC INTEGRATION**

#### **HIGH-SPEED CONVEYOR**

Recommend for transfering products from one location to another guickly.

UP/DOWNSTREAM OPTIONS. The ROO-100 can be enhanced with a variety of external components

## for a Full-line integration:

LABELER Automatically apply labels to pouches and/or cases.

**CASE PACKER** Pack pouches in a variety of case/boxes

PALLETIZER Stack ready-to-ship pallets. Robotic and traditional paletizer are availble.

CHECKWEIGHER Improve weight control and verification.

**METAL DETECTOR** Detect all unwanted metal particles.

**REJECT STATION** Discover and remove scrap pouches automatically.

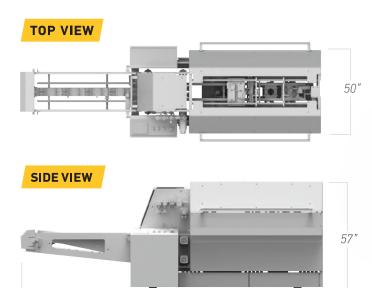

## MODELS

## ROO-100-5

5-STATION BASE MODEL

## R00-100-7

7-STATION EXTENDED MODEL

\_\_\_\_\_ 140" \_\_\_\_\_ R00-100-7 160"

## **TECHNICAL SPECIFICATION**

MACHINE PITCH	10"
SPEED	MAXIMUM SPEED 40 PPM
DIMENSIONS (ROO-100-5)	LENGTH 140" WIDTH 50" HEIGHT 57"
DIMENSIONS (R00-100-7)	LENGTH 160" WIDTH 54" HEIGHT 57"
POUCH SIZE RANGE	WIDTH 4-16" HEIGHT 6-21" GUSSET 0-6"
CONTROLS A. B. C	Compact Logic, A. B. PanelView HMI
SERVOS AND MOTORS	ALLEN BRADLEY
INPUT VOLTAGE	240-480 V
INPUT AIR	70-90 PSI

#### THE NORTECH GUARANTEE

All Nortech Packaging Machines Come Standard With:

- ✓ Fast Delivery and Global Service Support
- ✓ Detailed Manuals and Documentation
- Complete Spare Parts Support
